ABOUT ME

Mid-level Mobile Developer with 3+ years of experience in the consulting industry, specializing in Android development using Kotlin. Proven experience delivering scalable and high-performance mobile applications for enterprise clients. Skilled in modern Android architecture, Jetpack Compose, REST API integration, and clean code practices. Also experienced in cross-platform development using Flutter and Kotlin Multiplatform (KMP) to build efficient and maintainable multi-platform solutions.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES:

Kotlin, Java, Dart

MOBILE DEVELOPMENT:

Android SDK, Jetpack Compose, Flutter, Kotlin Multiplatform (KMP)

ARCHITECTURE & DESIGN PATTERNS:

MVVM, MVI, Clean Architecture, Modularization, Separation of Concerns

DATABASES & STORAGE:

SQLite, Room, SharedPreferences / DataStore

TOOLS & TECHNOLOGIES:

Git, Firebase, SonarQube, CI/CD, Gradle

EDUCATION

2019 - 2023	PRESIDENT UNIVERSITY Bachelor in Information Technology - GPA (3.66/4.00)
2023	PHINCON ACADEMY Android Development Path
2022	BANGKIT ACADEMY Mobile Development Path

ORGANIZATIONAL EXPERIENCE

2023 - 2024	MENTOR MOBILE DEVELOPMENT - BANGKIT ACADEMY • Lead and assist a cohort of 25 students in a class through a weekly session. • Provide collaborative support to learn and support each other. • Collaborating with other mentors and contributors.
--------------------	---

- Provide a supportive learning environment that will lead to a high graduation rate among your students, which is 89% at minimum

2020 - 2021 RESEARCH AND TECHNOLOGY DIVISION MEMBER - PUMA COMPUTING

- Participated in collaborative discussions and projects related to technology innovation.
- Supported research-oriented activities within the faculty community.
- Worked with peers to explore new ideas in technology development.

WORK EXPERIENCE

PT SIAGA ABDI UTAMA

MOBILE DEVELOPER

CLIENT: BANK RAKYAT INDONESIA

PROJECT: TPE TEAM - COMPOSABLE MOBILE APPS

Jun 2025 - Present

Description: Developed composable Android and multi-platform applications designed to streamline mobile app development processes within the AAP department. The project focused on building a modular, reusable, and scalable mobile architecture to accelerate development speed and improve maintainability.

My Contributions:

- Designed and developed an internal mobile UI Kit with a focus on modular architecture, enabling scalable and maintainable component usage across multiple applications.
- Built reusable and composable UI components using Jetpack Compose for native android and Flutter for cross-platform improving UI consistency and accelerating development cycles.
- Collaborated with the TPE and AAP teams to integrate business logic and ensure smooth system interoperability.
- Improved development efficiency by implementing reusable design patterns and enhancing build performance.
- Implemented versioning strategy for the UI Kit to ensure backward compatibility and controlled feature rollout across teams.

PT PHINCON

ANDROID DEVELOPER

CLIENT: MYTELKOMSEL

PROJECT: FMC (INDIHOME)

Aug 2023- Jun 2025

Description: Assigned to the TDW team, I contributed as an Android Developer of the MyTelkomsel app, specifically focused on IndiHome-related features. I worked in an agile environment with cross-functional teams including UI/UX designers, solution architects, QA, and backend developers to deliver high-quality, scalable, and maintainable Android app.

My Contributions:

- Feature Development – Implemented clean code for new features based on sprint planning and UI/UX designs, ensuring smooth functionality and user experience.
- Bug Fixing & Optimization – Investigated and resolved issues reported by the QA team, improving application stability and performance.
- Code Quality & Best Practices – Applied clean code principles, and best practices to ensure maintainability and scalability.
- Collaboration with Solution Architects (SA) – Analyzed technical documentation in Confluence to align with system architecture and business requirements.
- Performance Optimization – Enhanced application performance by reducing memory leaks, optimizing API calls, and improving UI rendering efficiency.

BANGKIT ACADEMY
ADVISOR CAPSTONE PROJECT

Aug 2024 -Jan 2025

My contributions:

- Mentored and guided capstone teams to successfully complete their projects on time while maintaining high standards of development.
- Helped teams integrate machine learning models into their Android applications using TensorFlow Lite (TFLite) and ML Kit, ensuring efficient on-device inference.
- Leveraged my expertise to help teams gain deeper insights and find innovative solutions to their technical challenges.
- Assisted teams in choosing the most suitable technologies and tools tailored to their specific problem statements, ensuring scalability and efficiency.
- Provided insights on agile development practices, sprint planning, and version control (Git) to help teams manage their projects effectively.

PT MOSTRANS
ANDROID DEVELOPER INTERN
PROJECT: DRIVER MOBILE APP

MAR 2023 - AUG 2023

Joined as an Android Developer Intern at Mostrans, contributing to the development of the driver application. Worked on key features including login, registration, and homepage implementation. Collaborated within a team environment to deliver functional and user-friendly mobile features.

My Contributions:

- Develop new features and functionalities for Driver app based on project requirements.
- Write clean, maintainable, and efficient code using clean architecture based on Kotlin.
- Create GraphQL schema and Integrate the APIs to add additional functionality to the application.
- Resolve bugs, errors, and performance issues within the Driver application.
- Work closely with the design team to implement intuitive and visually appealing user interfaces (UI) for Driver App.
- Participate in code reviews to ensure code quality, maintainability, and adherence to coding guidelines.
